

MULTIGRIP ^{PRO} _{HD}

Awesome grip for steep hills.

The distribution of grip and flotation is 75/25. The width of the link system is adapted to different types of tires.

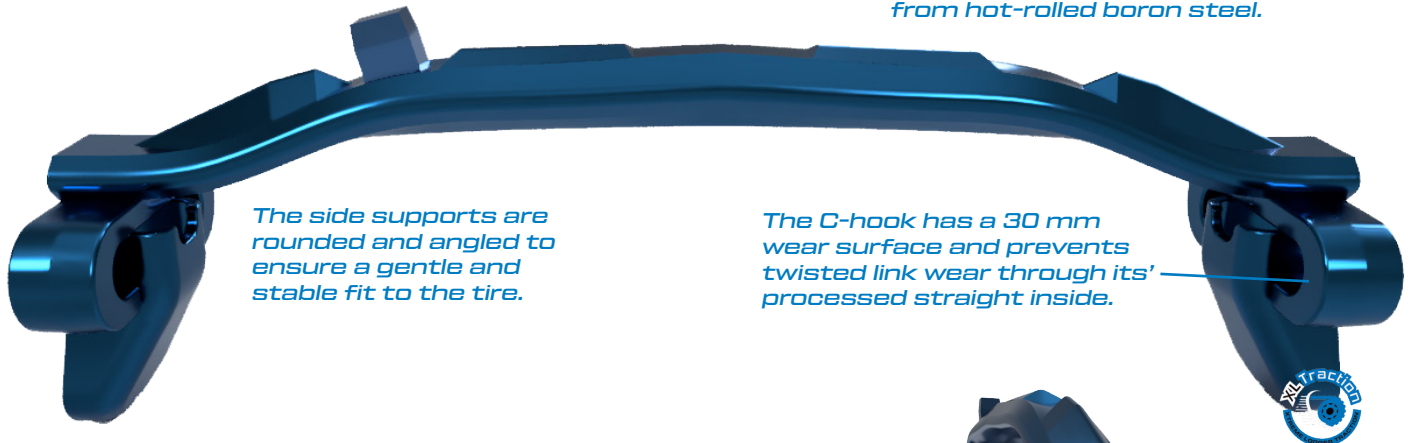

You get a fast delivery directly from our stock in Charlottenberg western Sweden.

■ Grip ■ Flotation

Available with single or double studs.

Durable and strong plate from hot-rolled boron steel.

The side supports are rounded and angled to ensure a gentle and stable fit to the tire.

The C-hook has a 30 mm wear surface and prevents twisted link wear through its' processed straight inside.

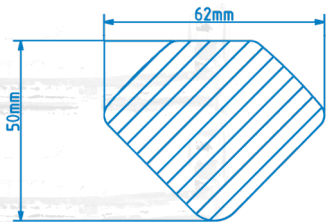

The plate profile is designed to give you the best grip in steep and rocky terrain. The integrated friction bar gives the track exceptional fit on the tire. The stud platform makes it easier for you to add or to replace studs correctly.

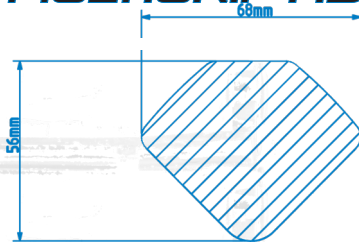

Hålvägen 1, 673 92 Charlottenberg • +46-571-21000 • info@xltraction.com • www.xltraction.com

MULTIGRIP PRO

The profile is designed for the best possible strength under multidirectional point loads.

MULTIGRIP HD

HEAVY DUTY

HD has an extra powerful profile to handle the heaviest strains.
