

UNI PRO HD

The allround track for various types of terrain.

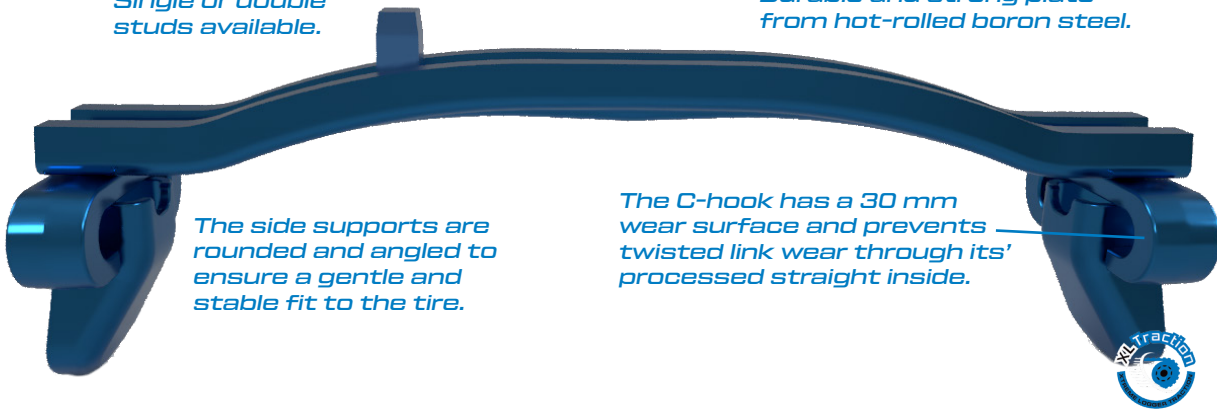

The UNI profile has the shape of a "U" to provide the best distribution of grip and flotation in different types of terrain. Underneath the profile the friction bar give excellent grip toward the tire.

■ Grip ■ Flotation

Single or double studs available.

Durable and strong plate from hot-rolled boron steel.

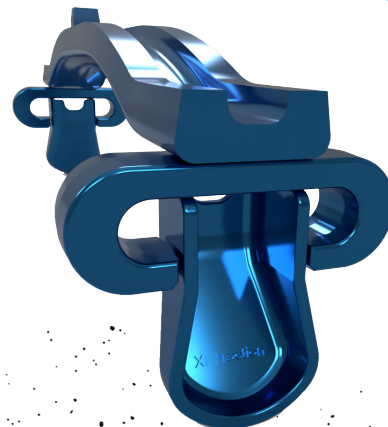

The side supports are rounded and angled to ensure a gentle and stable fit to the tire.

The C-hook has a 30 mm wear surface and prevents twisted link wear through its' processed straight inside.

The width of the link system is adapted to various types of tires.

You get a fast delivery directly from our stock in Charlottenberg, western Sweden.
